Be it suspenders, underwear or lingerie – stretch strap slide adjusters provide a simple way of adjusting the length of straps and suspenders. The metallic base material guarantees high strength and offers optimum security (break resistance). High-grade galvanizing ensures protection against corrosion – several coats of enamel offer maximum protection against abrasion.

Any required colour can be supplied (Pantone, RAL, fabric or other samples).

- ◆ Available in all COLOURS
- ◆ Simple adjustment of strap length
- ◆ Long life, extremely stable
- ◆ Oeko Tex certified

BUCKLES

Metal Miralloy-coated

Buckles are found in underwear, orthopedics, industrial safety and medical technology. They are used to adjust the length of straps and secure them in position.

Buckles are made of metal and given a nickel-free coating.

They can be supplied in various widths and for different tape thicknesses, also in an enamelled finish if required.

WISSNER buckles are exceptionally strong, functional and easy to use.
